ANSWERS TO QUESTIONS RECEIVED THROUGH 12:00 P.M. ON MARCH 17, 2023:

Q#2 I am trying to get in contact to someone that can tell me about the domestic requirements on a project that you have coming up for bid on Wednesday the 15th. I see that there is a domestic requirement on the structural load baring steel but I wanted to verify that pipe and fittings do not have any domestic requirements. Please let me know if there is someone that I can contact about this. The project is the Erie Island Service Plaza Milepost 100.0 pump station & force main.

A#2 The Commission is utilizing ODOT Specifications when modifications are not specifically noted. A review of the applicable ODOT specifications indicates that there are no domestic requirements for pipe and fittings.

Note:

- *Item Special - Pre-Fabricated Pump Station Building - Specifications have been updated to include an "Approved Alternate" pump station building from the pump manufacturer that includes integral items pre-installed for connection to the installed equipment. Items associated with the "Approved Alternate" pump station building are numbered in sequence from the originally specified Pre-Fabricated Building for reference. Special Provision pages SP-61 through SP-61C include these updated specifications.*
