Date

ANSWERS TO QUESTIONS RECEIVED THROUGH 1:00 P.M. ON FEBRUARY 14, 2025:

Q#2 With this project being exclusively in the passing lane and inside shoulder. Would OTIC entertain the option of hauling trucks flipping at the crossovers, if the adjacent bidirectional lane zone is pulled out/closed (night shafts) and the correct configuration is constructed with the portable barrier wall?

A#2 The Contractor will be permitted to use the existing median crossovers located within Project limits for turning haul trucks around during construction, provided the Contractor submits a detailed maintenance of traffic control plan for each median crossover to be utilized, showing how traffic will be protected from the turning haul trucks, to the Construction Engineer for review and approval. The Contractor will not be permitted to use the median crossovers until the maintenance of traffic control plans are approved. The median crossover shall be restored at the end of each daily shift prior to restoring 2 lanes of traffic. The Contractor will also be required to restore the existing median crossover to its original condition upon completion of the Project at no additional cost to the Commission.

Note: *The bid opening date has been extended from February 19, 2025, at 2:00 P.M. until February 26, 2025, at 2:00 P.M. (Eastern Time).*
